GLOBAL TRADE COMPLIANCE ANALYST

Detail-oriented compliance and data professional with a strong analytical background and growing hands-on experience in global trade compliance. Currently supporting export compliance analysis in a consulting environment, with strengths in data analysis, process documentation, screening support, and Excel-based compliance workflows. Known for quickly learning regulatory frameworks, translating complex requirements into practical controls, and supporting senior compliance professionals with reliable, well-documented analysis. Fluent in English and Russian, both written and spoken.

CORE COMPETENCIES

- Export Compliance Analysis (EAR exposure in U.S. export regulations context)
- Export Classification and Licensing
- ECCN determinations, CCATS requests
- Global Trade Compliance Audit Framework
- Compliance Data Analysis and Reporting
- Denied and Restricted Party Screening: E2Open
- End-User / End-Use Research and Due Diligence
- Process Documentation and SOP Support
- Risk Analysis and Issue Tracking
- Data Validation and QA Techniques

TECHNICAL SKILLS

- Microsoft Excel (formulas, pivot tables, lookups)
- Microsoft 365 (Word, PowerPoint, etc.)
- Google Workspace (Docs, Sheets, Slides)
- SNAP-R, E2Open
- Python (Pandas), Jupyter Notebook, NotebookLM
- SQL, PostgreSQL
- Tableau
- AI-assisted data cleanup, summarization, and workflow support; all outputs subject to human review and decision-making

PROFESSIONAL EXPERIENCE

Global Trade Advisory LLC — Remote, MA

Trade Compliance Analyst (Part-Time) | 2024 – Present

- Support senior trade compliance consultants with day-to-day export compliance analysis across multiple client engagements.
- Perform denied and restricted party screening reviews and help analyze potential false positives.
- Use open-source intelligence and internal client data for end-user and end-use research supporting EAR.
- Prepare and maintain Excel-based tracking tools for compliance reviews, screening logs, and audit-ready documentation, utilizing formulas and pivot tables.
- Perform data cleanup, organization, and analysis to improve visibility into compliance workflows and client risk areas.
- Draft and update internal compliance documentation, summaries, and client-facing analysis materials.
- Collaborate remotely using Microsoft 365 and Google Workspace, maintaining version control and clear documentation standards.

GloMove, Inc. — Remote, MA

Marketing and Data Analyst (Part-Time) | 2023 – Present

- Translate business and operational objectives into structured analytical approaches and reporting outputs.
- Collect, clean, and analyze diverse datasets using Excel, SQL, and visualization tools.
- Develop clear, executive-ready reports and presentations to support management and investor decision-making.
- Apply analytical thinking and pattern recognition skills directly transferable to compliance risk analysis.

Other administrative and data analytics experience

Operations Manager, Business Analyst, Project Controls Manager | 2003 – 2023

- Created and maintained administrative and financial record systems, ensuring accuracy, traceability, and audit readiness.
- Developed and implemented standard operating procedures to support consistent business operations.
- Analyzed program plans and forecasts to anticipate resource needs, schedules, and operational risks.
- Resolved data discrepancies and ensured reliability of internal reporting.
- Designed internal reporting systems for financial management, forecasting, and performance monitoring.
- Delivered regular analytical reports with clear interpretations to senior management.
- Identified trends and inefficiencies through structured data analysis, supporting business strategy decisions.
- Developed project controls systems and procedures in regulated environments.
- Maintained master schedules, work breakdown structures, and performance metrics.
- Applied earned value management system and progress analysis principles to complex, multi-stakeholder projects.

EDUCATION & CERTIFICATIONS

- **Data Analytics Certificate**, Career Foundry (Intensive, Project-Based Program), 2023
- **Introduction to Computer Science and Programming Using Python**, MITx, 2020
